DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the claims are allowed. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

2. Claims 1-41 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method and system for coding compound frames which is able to transmit varying degrees of quality of compound images over time and to encode a compound frame of data into a series of base layers and one or more series of enhancement layers using minimal computation power (see specification, page 4, lines 11-16). Particularly, the new method and system comprise the following features, which the prior art taken either singly or in combination does not teach:

- if the selected block is within a threshold difference of the block in the previous frame, generating a signal to use the block in the frame previous to the accepted frame, otherwise; if the selected frame is a non-picture block,... at least

two non-picture layers; and if the selected block is picture block, ... at least two picture layers (see independent claim 1);

- a non-picture block compressor... using a first compression system; and
a picture block compressor... using a second compression system (see independent claims 20 and 36).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
